| **Title:** DOOR LOCK: WIRELESS DOOR LOCK CONTROL SYSTEM: GENERAL; 2013 MY RAV4 [12/2012 - ] | | |

# GENERAL

## 1. OUTLINE

(a) The wireless door lock control system is a convenient system for locking and unlocking all the doors from a distance.

(b) In this system, the door control receiver performs the code identification process and the main body ECU performs door lock control.

(c) A key-integrated type door control transmitter sub-assembly is used, and it contains up to a maximum of 4 buttons: lock button, unlock button, panic button and power back door button*.

*: Models with power back door system

(d) When preparing a new door control transmitter sub-assembly to replace one that has been lost, it is necessary to register the recognition code. For details, refer to the Repair Manual.

(e) The content applies to models without the smart key system. For models with the smart key system, see Wireless Door Lock Control Function in Smart Key System.
