Combination Meter

The three-eye graphic meter is easy to see and read.

- LEDs (Light Emitting Diodes) have been adopted for all meters, gauges, indicator lights, and warning lights, resulting in excellent visibility.
- The odometer and tripmeter use an LCD (Liquid Crystal Display).
- The conventional water temperature gauge has been discontinued, and in its place, a water temperature indicator light has been adopted. If the water temperature falls below approximately 50°C, a blue indicator light illuminate. If the water temperature rises above approximately 117°C, an LED flashes.
