System Outline

Daytime Running Light Function

When power SW is at IG ON position and the vehicle is ready to drive (READY lamp on the display in combination meter is on), releasing parking brake makes signal go into TERMINAL PKB of body ECU. In this condition, when light control SW is at Off/Tail/AUTO position (Headlight is not lit), body ECU sends daytime operation request from TERMINAL DRL/DIM to daytime running light relay. As a result, daytime running light relay duty-operations headlights (Dimmer than regular lighting)

Service Hints

C11 Combination SW

20-12 : Continuity with the light control SW at HEAD position

17-12 : Continuity with the dimmer SW at FLASH position

11-12 : Continuity with the dimmer SW at HIGH position
