A. SPORTSTER PREMIUM OIL COOLER

This product brings touring model cooler technology to the Sportster. This vertical-mount cooler features a unique "Turbulator" system that efficiently distributes oil across the cooling chambers. The air fins feature several louvers to efficiently dissipate heat. The premium oil cooler has been designed for ease of installation, and features an adapter plate that allows oil lines to connect to the oil filter bracket. Kit includes oil cooler, oil filter mount, oil lines and mounting hardware.

62996-04 Fits '82-later XL models.

INSIDE VIEW OF PREMIUM OIL COOLER WITH TURBULATORS

Turbulators disperse and mix oil inside cooler to provide more efficient cooling capabilities. The cooler oil is not allowed to remain along the boundaries of the flow tube as in conventional coolers.

INSIDE VIEW OF CONVENTIONAL OIL COOLER WITHOUT TURBULATORS

Coolers without the Turbulator system allow oil to flow only in a straight path. Oil does not mix and the cooler oil remains along the outer boundaries, while the hotter oil remains along the centre path of flow. Without the mixing effects of the Turbulators, the conventional oil cooler provides less efficient cooling capabilities.

B. SPORTSTER CHROME OIL COOLER COVER

Add a beautiful accent to your Sportster Premium Oil Cooler. This chrome cover is designed to allow proper air flow through the integrated duct work. Requires Permatex® clear silicon RTV adhesive for installation.

74627-01 Fits '82-later Sportster models equipped with Premium Oil Cooler P/N 62996-04.

C. LCD OIL TEMPERATURE DIPSTICK

Add function and style by replacing your stock dipstick with this hardworking version, which includes a beautiful chrome cap and LCD (liquid crystal display) oil temperature readout. The readout is push button operated with an automatic shut-off in five seconds and operates within plus or minus one degree. Designed also to stay on up to 15 minutes if desired. Fahrenheit or Celsius can be changed with a simple push button operation. The readout is displayed with a rare blue light background for easier operation at night. All LCD dipsticks now incorporate an updated and more heat resistant LCD electronic unit. Twin Cam 88® LCD dipsticks also include an improved twist and pull cam-lock removal feature. Designed to be waterproof with replaceable standard battery. Patented.

62972-02A Fits '84-'03 XL models.

D. THERMOSTAT KIT

Thermostat features an advanced design that makes it smaller so that it can be hidden after installation. Thermostat is designed to allow oil flow to the cooler starting at 180° Fahrenheit, while restricting oil flow to the cooler when oil temperature falls below 180° Fahrenheit. Reliable function provides additional confidence to the rider who adds an oil cooler to their riding application.

62878-99 Fits all models with oil coolers.
